DIMENSIONS

Basic machine with undercarriage

TECHNICAL FEATURE

1.Stronger lifting capacity:

· The strongest 5-section 47m U shape boom; The maximum lifting torque is 3087kN. M, and the single rope tension is 8.6t; Full boom frontal load is 14T; The comprehensive lifting capacity is 10% more than that of the same level in the industry.

2.Higher reliability:

· Based on the mature modular design of truck crane and crawler crane of Zoomlion, the key parts are of first-class brand, and the whole machine has passed the strict operation reliability assessment and is stable and reliable.

3.Better adaptability:

· large gauge telescopic crawler chassis structure, good vehicle stability; The traveling mechanism adopts built-in planetary reducer and large torque motor, which has large driving force and strong climbing ability.

4.More convenient transfer:

· The whole machine can be transported by removing the counterweight. The track beam can be removed to meet the 3m transportation condition; Counterweight and crawler can be self-loading and unloading function which is highly efficient.

TRANSPORTATION DIMENSIONS AND WEIGHT

Superstructure (with boom)

Length (L)	14670 mm

2. The weight does not include the package, which may be slightly different from the mark due to manufacturing error;

TECHNICAL DESCRIPTION

Engine

Engine type---- Weichai WP7G270E301
 Rated power---- 199kW/2000rpm
 Maximum output torque---- 1200N.m/1300rpm
 Fuel tank----- 600L

Hydraulic system

The crane adopts a hydraulic system with hydraulic pilot proportional control. The high-speed hydraulic motor drives the planet reducer to realize movements of the mechanisms. The system has such advantages as high efficiency, energy-saving, smooth and safe simultaneous movements.
 Cooler: a radiator driven by a high-power hydraulic motor, 40 kW
 Hydraulic oil tank capacity-----1000L

Hoisting winch

It consists of a main hoist mechanism and an auxiliary hoist mechanism. The two hoist mechanisms are driven by an axial plunger hydraulic motor with a built-in planetary gear reducer to lift or lower the hook. A brake is fitted between the motor and reducer. The two winch mechanisms can be controlled independently and also can carry out simultaneous movements. The auxiliary hoist winch is of same model of the main winch;

Specifications for high-tensile torsion resistant hoist rope:
 Diameter: 20.0 mm Strength grade: 2160 N/mm²
 Length of main hoist rope: 260 m
 Length of auxiliary hoist rope: 140 m
 Single rope pulling force: 8.6 t

Swing

Driven by planetary gear reducer, the axial quantitative plunger hydraulic motor can realize 360 ° full rotation of the turntable. The free sliding function can effectively reduce the lateral tension on the boom.
 Slewing bearing:
 Single-row-roller and four-point-contact slewing bearing, internal gearing
 Slewing speed:
 The maximum slewing speed is 1.6 rpm.
